# CHAPTER 1

---

## Nobinobi Staff

---

Application staff for nobinobi

### 1.1 Documentation

The full documentation is at <https://nobinobi-staff.readthedocs.io>.

### 1.2 Quickstart

Install Nobinobi Staff:

```
pip install nobinobi-staff
```

Add it to your *INSTALLED\_APPS*:

```
INSTALLED_APPS = (  
    ...  
    'nobinobi_staff.apps.NobinobiStaffConfig',  
    ...  
)
```

Add Nobinobi Staff's URL patterns:

```
from nobinobi_staff import urls as nobinobi_staff_urls
```

(continues on next page)

(continued from previous page)

```
urlpatterns = [  
    ...  
    path('', include(nobinobi_staff_urls)),  
    ...  
]
```

## 1.3 Features

- TODO

## 1.4 Running Tests

Does the code actually work?

```
source <YOURVIRTUALENV>/bin/activate  
(myenv) $ pip install tox  
(myenv) $ tox
```

## 1.5 Development commands

```
pip install -r requirements_dev.txt  
invoke -l
```

## 1.6 Credits

Tools used in rendering this package:

- [Cookiecutter](#)
- [cookiecutter-djangopackage](#)

## CHAPTER 2

---

### Installation

---

At the command line:

```
$ easy_install nobinobi-staff
```

Or, if you have virtualenvwrapper installed:

```
$ mkvirtualenv nobinobi-staff  
$ pip install nobinobi-staff
```

## CHAPTER 3

---

### Usage

---

To use Nobinobi Staff in a project, add it to your *INSTALLED\_APPS*:

```
INSTALLED_APPS = (  
    ...  
    'nobinobi_staff.apps.NobinobiStaffConfig',  
    ...  
)
```

Add Nobinobi Staff's URL patterns:

```
from nobinobi_staff import urls as nobinobi_staff_urls  
  
urlpatterns = [  
    ...  
    path('', include(nobinobi_staff_urls)),  
    ...  
)
```

Contributions are welcome, and they are greatly appreciated! Every little bit helps, and credit will always be given. You can contribute in many ways:

## 4.1 Types of Contributions

### 4.1.1 Report Bugs

Report bugs at <https://github.com/prolibre-ch/nobinobi-staff/issues>.

If you are reporting a bug, please include:

- Your operating system name and version.
- Any details about your local setup that might be helpful in troubleshooting.
- Detailed steps to reproduce the bug.

### 4.1.2 Fix Bugs

Look through the GitHub issues for bugs. Anything tagged with “bug” is open to whoever wants to implement it.

### 4.1.3 Implement Features

Look through the GitHub issues for features. Anything tagged with “feature” is open to whoever wants to implement it.

### 4.1.4 Write Documentation

Nobinobi Staff could always use more documentation, whether as part of the official Nobinobi Staff docs, in docstrings, or even on the web in blog posts, articles, and such.

### 4.1.5 Submit Feedback

The best way to send feedback is to file an issue at <https://github.com/prolibre-ch/nobinobi-staff/issues>.

If you are proposing a feature:

- Explain in detail how it would work.
- Keep the scope as narrow as possible, to make it easier to implement.
- Remember that this is a volunteer-driven project, and that contributions are welcome :)

## 4.2 Get Started!

Ready to contribute? Here's how to set up *nobinobi-staff* for local development.

1. Fork the *nobinobi-staff* repo on GitHub.
2. Clone your fork locally:

```
$ git clone git@github.com:your_name_here/nobinobi-staff.git
```

3. Install your local copy into a virtualenv. Assuming you have virtualenvwrapper installed, this is how you set up your fork for local development:

```
$ mkvirtualenv nobinobi-staff
$ cd nobinobi-staff/
$ python setup.py develop
```

4. Create a branch for local development:

```
$ git checkout -b name-of-your-bugfix-or-feature
```

Now you can make your changes locally.

5. When you're done making changes, check that your changes pass flake8 and the tests, including testing other Python versions with tox:

```
$ flake8 nobinobi_staff tests
$ python setup.py test
$ tox
```

To get flake8 and tox, just pip install them into your virtualenv.

6. Commit your changes and push your branch to GitHub:

```
$ git add .
$ git commit -m "Your detailed description of your changes."
$ git push origin name-of-your-bugfix-or-feature
```

7. Submit a pull request through the GitHub website.

## 4.3 Pull Request Guidelines

Before you submit a pull request, check that it meets these guidelines:

1. The pull request should include tests.
2. If the pull request adds functionality, the docs should be updated. Put your new functionality into a function with a docstring, and add the feature to the list in README.rst.
3. The pull request should work for Python 2.6, 2.7, and 3.3, and for PyPy. Check [https://travis-ci.org/prolibre-ch/nobinobi-staff/pull\\_requests](https://travis-ci.org/prolibre-ch/nobinobi-staff/pull_requests) and make sure that the tests pass for all supported Python versions.

## 4.4 Tips

To run a subset of tests:

```
$ python -m unittest tests.test_nobinobi_staff
```

### 5.1 Development Lead

- Florian Alu <alu@prolibre.com>

### 5.2 Contributors

None yet. Why not be the first?

#### **6.1 0.1.6.10 (2023-06-19)**

- Update requirements

#### **6.2 0.1.6.9 (2023-06-14)**

- Update requirements

#### **6.3 0.1.6.8 (2021-12-23)**

- 879490a - filter on choice staff absence only active staff
- d04ba24 - Fix bug when save staff for training

#### **6.4 0.1.6.7 (2021-12-22)**

- c19f6cb - Filter by default to staff active in list admin
- dd97bda - Fix requirements

#### **6.5 0.1.6.6 (2021-12-14)**

- 7562c55 - Change str format in full name by last\_name - first\_name
- 78bf3e3 - Fix error import
- Update requirements

## 6.6 0.1.6.5.2 (2021-09-29)

- 022c118 - Fix import missing in commands
- Update requirements

## 6.7 0.1.6.5.1 (2021-09-17)

- 002cb4c - fix bug with search field icontains

## 6.8 0.1.6.5 (2021-09-17)

- c4dd7a1 - Add search field for training
- 3a28df3 - Fix error with generate command when staffs args filled

## 6.9 0.1.6.4 (2021-09-17)

- 7599706 - Update traduction
- 0581582 - Update system to generate and update training auto
- a60c325 - Add default\_auto\_field

## 6.10 0.1.6.3 (2021-09-16)

- 4d973ec - Update “update command” for training
- 184406d - Change signals to update training when absence
- 88245dd - Change admin display in training add select related in staff
- 2a0b8f8 - Add method to get datetime\_range in model add tracker in absence to get previous date

## 6.11 0.1.6.2 (2021-09-14)

- Update requirements.
- 2fb2bfa - Add signal when absence is saved and training not created

## 6.12 0.1.6.1 (2021-06-07)

- Update requirements.
- Update django for security fix

## 6.13 0.1.6 (2021-04-13)

- 186a796 - Fix upload publish
- Update requirements.

## 6.14 0.1.5 (2021-03-12)

- Add an export function for Absence
- Update requirements.
- Update traduction FR.

## 6.15 0.1.4 (2020-10-29)

- Add fields ["picture", "nationality", "civil\_status", "status", "status\_modified", "created", "modified"].
